**AFFILIATED TO**  
**DR. A.P.J. ABDUL KALAM TECHNICAL UNIVERSITY, U.P.,**  
**LUCKNOW**  
**(Formerly UPTU)**

## **STUDENT'S DECLARATION**

I hereby declare that the work being presented in this report entitled "**STUDENT RECORD SHEET**" is an authentic record of my own work carried out under the supervision **Mr. Jitendra Chauhan, Assistant Professor, Information Technology**.

The matter embodied in this report has not been submitted by me for the award of any other degree.

**Date:**

**Name: Dharmendra Kumar**

**Roll No.: 2000320130056**

**Department: Information Technology**

This is to certify that the above statement made by the candidate(s) is correct to the best of my knowledge.

**Signature of HOD**

**(Name: Prof. Amit Sinha)**

**Signature of Coordinator**

**(Name :Mr. Jitendra Chauhan)**

**(Information Technology)**

**(Assistant Professor)  
(Information Technology)**

**Date: .....**

## **ACKNOWLEDGEMENT**

Presentation inspiration and motivation have always played a key role in the success of any venture.

I express my sincere thanks to my project coordinator **Mr. Jitendra Chauhan** to encourage me to the highest peak and to provide me this opportunity to prepare this project. I extend my hearty thanks for giving me the proper guidance even in this time, when everything is continuing on just online platforms.

I am highly indebted to coordinator **Mr. Jitendra Chauhan** for the constant supervision, for providing all the necessary information and support in completing the project.

Finally, I am sincerely thankful to all those people who are directly or indirectly involved in the successful completion of this project work.

**Signature of student**

**Name: Dharmendra Kumar**

**Roll No.: 2000320130056**

## INTRODUCTION

There are a various of place where we need to store the data/record of people. Like school/college student, employees etc. Every Institute/Organization stores their employees or related people's data in a organized manner and there a lot of method to store the information of the people. Every method, which help to store the record, have their own specific methodology. So my project provides a platform to collect and store the information of the people.

Here, I am with my project named "**Student Record Sheet**" to develop a methodology on the basis of "File Handling" to collect and store the information of student/employees.

Basically In this project, when code will run then it will show a screen with some choices like Insert student record, Display student record, search student record, Delete student record, update student record and Exit. User have to choose a option. If user choose a option to insert the data, user need to insert some information and that information will store in a file which is saved in the system. Same will happen in other options accordingly. To display, search and delete the record it need to enter a roll no. of a student to do all these operation.

I have learnt a lot of things from this project. I'll try to make it more better and beneficial.

# **REQUIREMENT SPECIFICATION**

## **User and data requirements**

- CodeBlock software should be successfully installed on user system.
- Student results for the store the information.
- This stores information about student's names, roll number, marks, and calculate result accordingly.

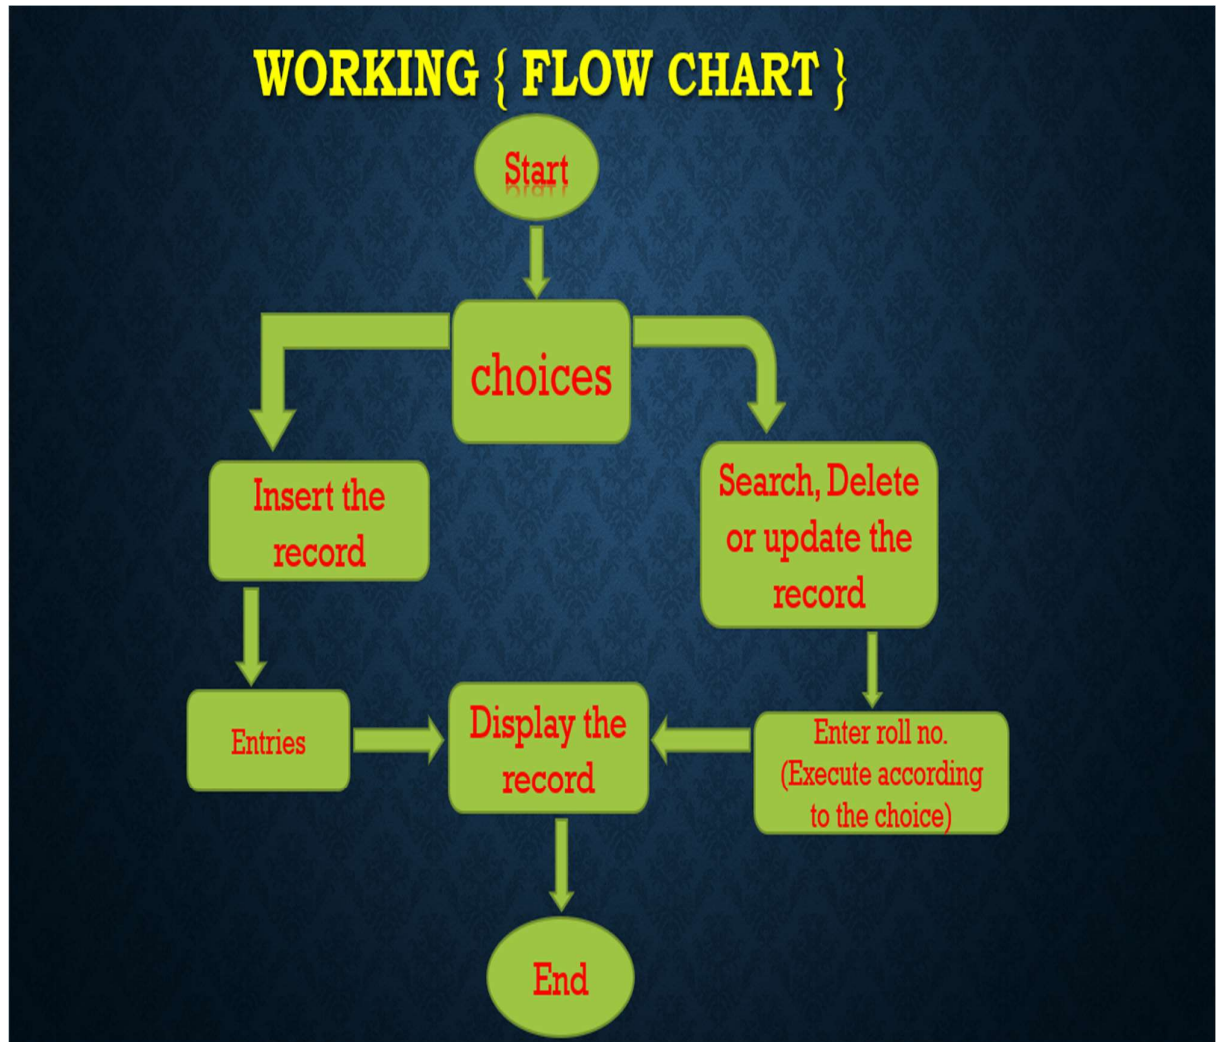

## **Software requirements**

- Compiler: CodeBlock
- Operating System: Windows 7, 8 or 10
- RAM: 256 MB to 2 GB.
- Processor: Dual Core to Core i7.
- Hard Disk Usage: 1 to 5 MB.

## **Hardware requirements**

- High resolution screen.
- Mouse.
- Keyboard.
- Printer.

## WORK FLOW

## **RESULT & DISCUSSION**

- I have created an application which help to store the information of the people belongs to an Institution or Organization.
- I have also some extra functionalities foe deletion, searching, updation etc.
- This application will help the Organization to maintain all the information about their worker, employees or students.
- I have designed a user-friendly application to handle and maintain the all the information in record form.

## **CONCLUSION & FUTURE DEVELOPMENT**

### **Conclusion**

- ❖ We can store the record of the students and that record can be updated, deleted or accessed by student's roll no.
- ❖ User can access the record of any student.
- ❖ This project gives me an opportunity to acquire good skills which help me to achieve perfection in my coding or programming.

### **Future Development:**

- I would add a tool which help to calculate the marksheet/result of a student on the basis of given information.
- I would like to the functionalities of GUI in future.

## DETAILS OF THE PROJECT

### Appendix-1: Coding

- ❖ Declaration of structure for containing all the information about the student.

```
#include<stdio.h>
#include<conio.h>

void insert_record();
void display_record();
void search_record();
void del_record();
void update_record();

struct student
{
    int roll;
    char sec[10];
    char name[40];
    int marks;
    float grade_point;
};

struct student s;
```

❖ Main function of program

```
void main()
{
    int ch;
    while(ch!=7)
    {
        printf("\t*****\n");
        printf("\t\tWELCOME TO STUDENT MANAGEMENT PROGRAM\n");
        printf("\t*****\n\n\n");

        printf("\t**** AVAILABLE FUNCTIONALITIES ****\n\n\n");
        printf("\t\t1: Insert student record\n");
        printf("\t\t2: Display student record\n");
        printf("\t\t3: Search student record\n");
        printf("\t\t4: Delete student record\n");
        printf("\t\t5: Update student record\n");
        printf("\t\t6: Exit\n\n");
        printf("\t\tEnter your choice : ");
        scanf("%d",&ch);
    }
}
```

❖ Switch case in main function

```
switch(ch)
{
    case 1:insert_record();
        break;
    case 2:display_record();
        break;

    case 3:search_record();
        break;

    case 4:del_record();
        break;
    case 5:update_record();
        break;
    case 6:exit(1);
    default:
        printf("\n\t\tWrong choice Entered");
}
printf("\n\t\tPress any key to continue ");
getch();
}
```

❖ Function to insert the data of a student

```
void insert_record()
{
    FILE *fp;
    fp=fopen("stu.txt", "ab+");
    if(fp==NULL)
    {
        printf("\n\t\tError: Cannot Open the File!!!");
        return;
    }
    printf("\t **** Previous Stored Data ****");
    display_record();
    printf("\n\n\t**** ENTER NEW STUDENT DATA ****\n\n");
    printf("\n\t\tEnter Student Roll Number: ");
    scanf("%d", &s.roll);
    fflush(stdin);
    printf("\n\t\tEnter Student Name: ");
    gets(s.name);
    printf("\n\t\tEnter Student Section: ");
    gets(s.sec);
    printf("\n\t\tEnter Student Total marks: ");
    scanf("%d", &s.marks);
    printf("\n\t\tEnter Student Grade Point: ");
    scanf("%f", &s.grade_point);
    fwrite(&s, sizeof(s), 1, fp);
    {
        printf("\n\n\t !!! Student Record Inserted Sucessfully\n");
    }
    fclose(fp);
    printf("\n\t\tUpdated Record !!\n");
    display_record();
}
```

❖ Function to display all the recorded information

```
void display_record()
{
    FILE *fp;
    fp=fopen("stu.txt", "rb");
    if(fp==NULL)
    {
        printf("\n\tError : Cannot open the File !!!");
        return;
    }
    printf("\n\n\t **** Students Details Are As Follows ****\n");
    printf("\nRoll.No\tName of Student\tSection\tMarks\tGrade Point\n\n");
    //printf("a.students roll number\t b.student name\t c.student section\t d.student marks\t e.student grade");
    while(fread(&s,sizeof(s),1,fp)==1)
    {
        printf("%d\t%s\t%s \t\t%d\t\t%f\n",s.roll,s.name,s.sec,s.marks,s.grade_point);
    }
    fclose(fp);
}
```

- ❖ Function to Search the information of a particular student with calling its roll no.

```
void search_record()
{
    int ro, flag=0;
    FILE *fp;
    fp=fopen("stu.txt", "rb");
    if(fp==NULL)
    {
        printf("\n\t\tError: Cannot Open the File!!!");
        return;
    }
    printf("\n\n\tEnter Student Roll Number Which You Want To Search: ");
    scanf("%d", &ro);
    while(fread(&s, sizeof(s), 1, fp)>0 && flag==0)
    {
        if(s.roll==ro)
        {
            flag=1;
            printf("\n\n\tSearch Sucessfull And Student Records Is as Follows: \n\n");
            printf("\nRoll.No\tName of Student\tSection\t\tMarks\t\tGrade Point\n\n");
            printf("%d\t%s\t%s \t\t%d\t\t%f\n", s.roll, s.name, s.sec, s.marks, s.grade_point);
        }
    }
    if(flag==0)
    {
        printf("\n\n\t\tNo Such Record Found !!!!!\n");
    }
    fclose(fp);
}
```

- ❖ Function to delete the information of a particular student with calling its roll no.

```

void del_record()
{
    int ro, flag=0;
    FILE *fp, *ft;
    fp=fopen("stu.txt", "rb");
    ft=fopen("stu1.txt", "ab+");
    if(fp==NULL)
    {
        printf("\n\t\tError: Cannot Open the File!!!");
        return;
    }
    printf("\n\t **** Previous Stored Data ****");
    display_record();
    printf("\n\n\tEnter Student Roll Number Which You Want to Delete ");
    scanf("%d", &ro);
    while(fread(&s, sizeof(s), 1, fp)>0 && flag==0)
    {
        if(s.roll==ro)
        {
            flag=1;
            printf("\n\t\tRecord Deleted Sucessfully \n");
        }
        else
        {
            fwrite(&s, sizeof(s), 1, ft);
        }
    }
    if(flag==0)
    {
        printf("\n\n\t\tNo Such Record Found !!!");
    }
    fclose(fp);
    fclose(ft);
    remove("stu.txt");
    rename("stu1.txt", "stu.txt");
    printf("\n\t\tUpdated Record !!\n");
    display_record();
}

```

❖ Function to correct or update the recorded information

```
,  
void update_record()  
{  
    int ro, flag=0;  
    FILE *fp;  
    fp=fopen("stu.txt", "rb+");  
    if(fp==NULL)  
    {  
        printf("\n\t\tError: Cannot Open the File!!!");  
        return;  
    }  
    printf("\n\n\tEnter Roll Number of Student Whose Record You Want To Update: ");  
    scanf("%d", &ro);  
    printf("\n\t\t*** Previously Stored Record Of Given Roll Number ***");
```

```

while(fread(&s,sizeof(s),1,fp)>0 && flag==0)
{
    if(s.roll==ro)
    {
        flag=1;
        printf("\nRoll.No\tName of Student\tSection\t\tMarks\t\tGrade Point\n\n");
        printf("%d\t%s\t%s \t\t%d\t\t%f\n",s.roll,s.name,s.sec,s.marks,s.grade_point);
        printf("\n\t\t*** Now Enter the New Record ***\n\n");

        printf("\n\t\tUpdated Student Roll Number: ");
        scanf("%d",&s.roll);
        fflush(stdin);
        printf("\n\t\tUpdated Student Name: ");
        gets(s.name);
        printf("\n\t\tUpdated Student Section: ");
        gets(s.sec);
        printf("\n\t\tUpdated Student Marks: ");
        scanf("%d",&s.marks);
        printf("\n\t\tUpdated Student Grade Point: ");
        scanf("%f",&s.grade_point);
        fseek(fp,-(long)sizeof(s),1);
        fwrite(&s,sizeof(s),1,fp);
        printf("\n\n\t\tRecord Updated Successfully Check The Display Section!!\n\t\t");
    }
}

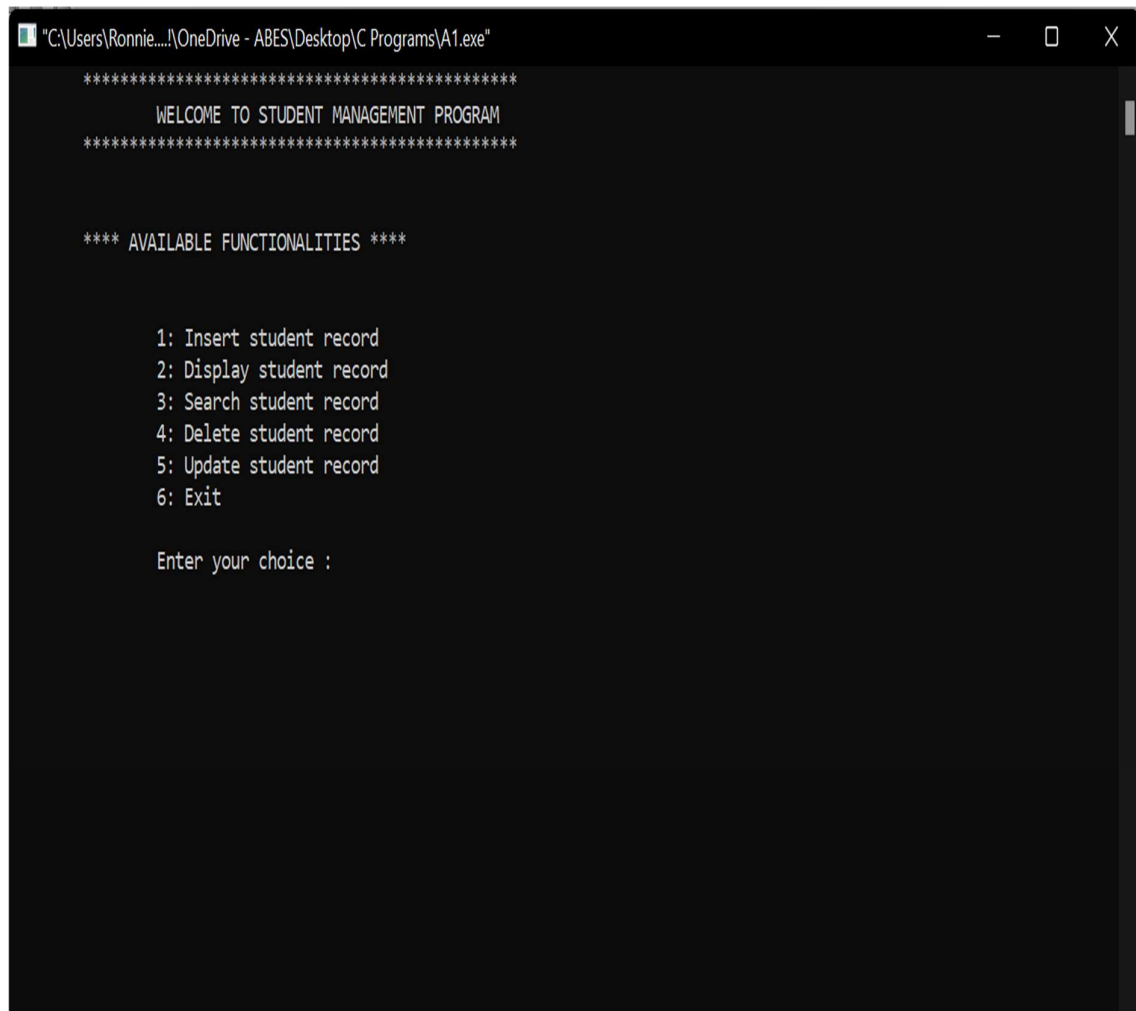

if(flag==0)
{
    printf("\n\t\tError : Something went wrong!!!");
}

fclose(fp);
}

```

## OUTPUTS SCREEN

- ❖ When User run the program then the program will show the run time screen. The very first screen consists of some choices.

```
"C:\Users\Ronnie....\OneDrive - ABES\Desktop\C Programs\A1.exe"

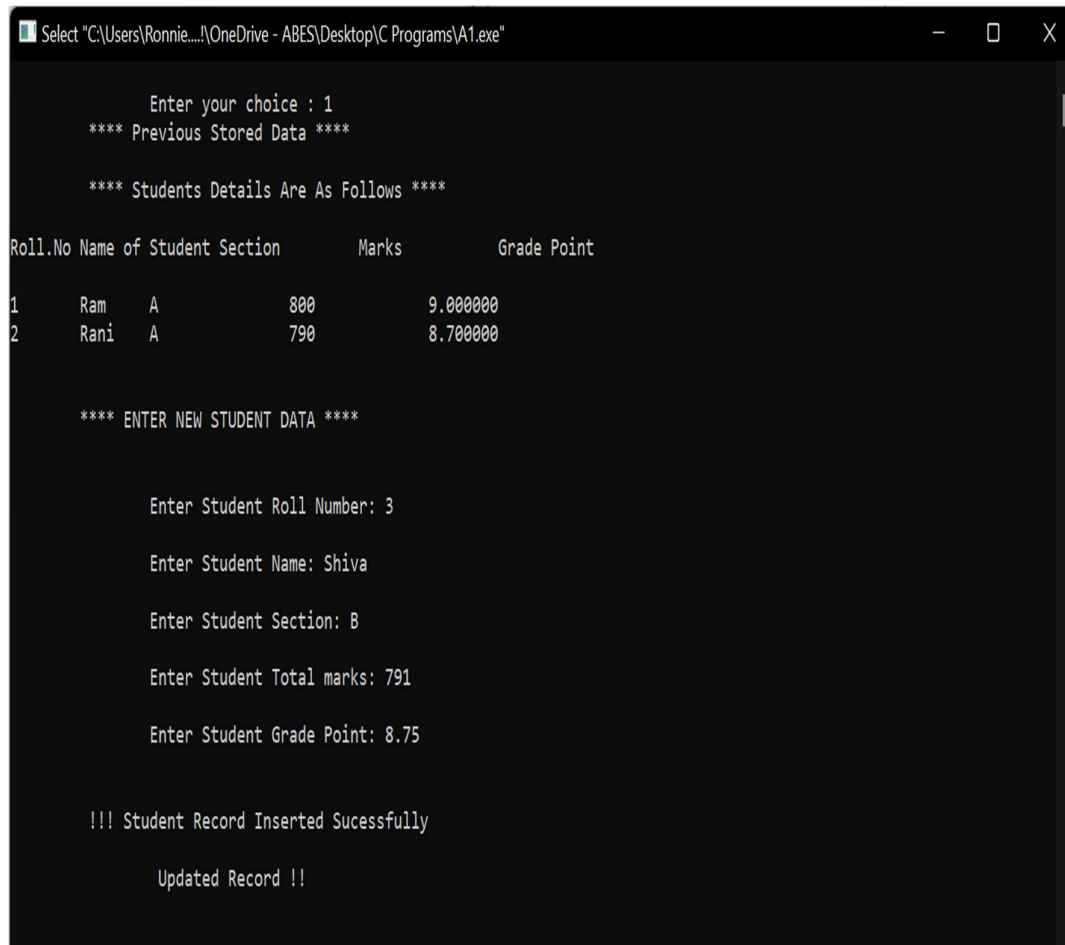

*****
WELCOME TO STUDENT MANAGEMENT PROGRAM
*****

*** AVAILABLE FUNCTIONALITIES ***

1: Insert student record
2: Display student record
3: Search student record
4: Delete student record
5: Update student record
6: Exit

Enter your choice :
```

- ❖ Now user have to choose an option. When user choose “**Insert student record**” to insert the information of a student then user get a screen. That screen will show the stored data and user need to insert the data accordingly.

```
Select "C:\Users\Ronnie...\\OneDrive - ABES\Desktop\C Programs\A1.exe"

Enter your choice : 1
**** Previous Stored Data ****

**** Students Details Are As Follows ****

Roll.No Name of Student Section      Marks      Grade Point
1      Ram      A      800      9.000000
2      Rani      A      790      8.700000

**** ENTER NEW STUDENT DATA ****

Enter Student Roll Number: 3

Enter Student Name: Shiva

Enter Student Section: B

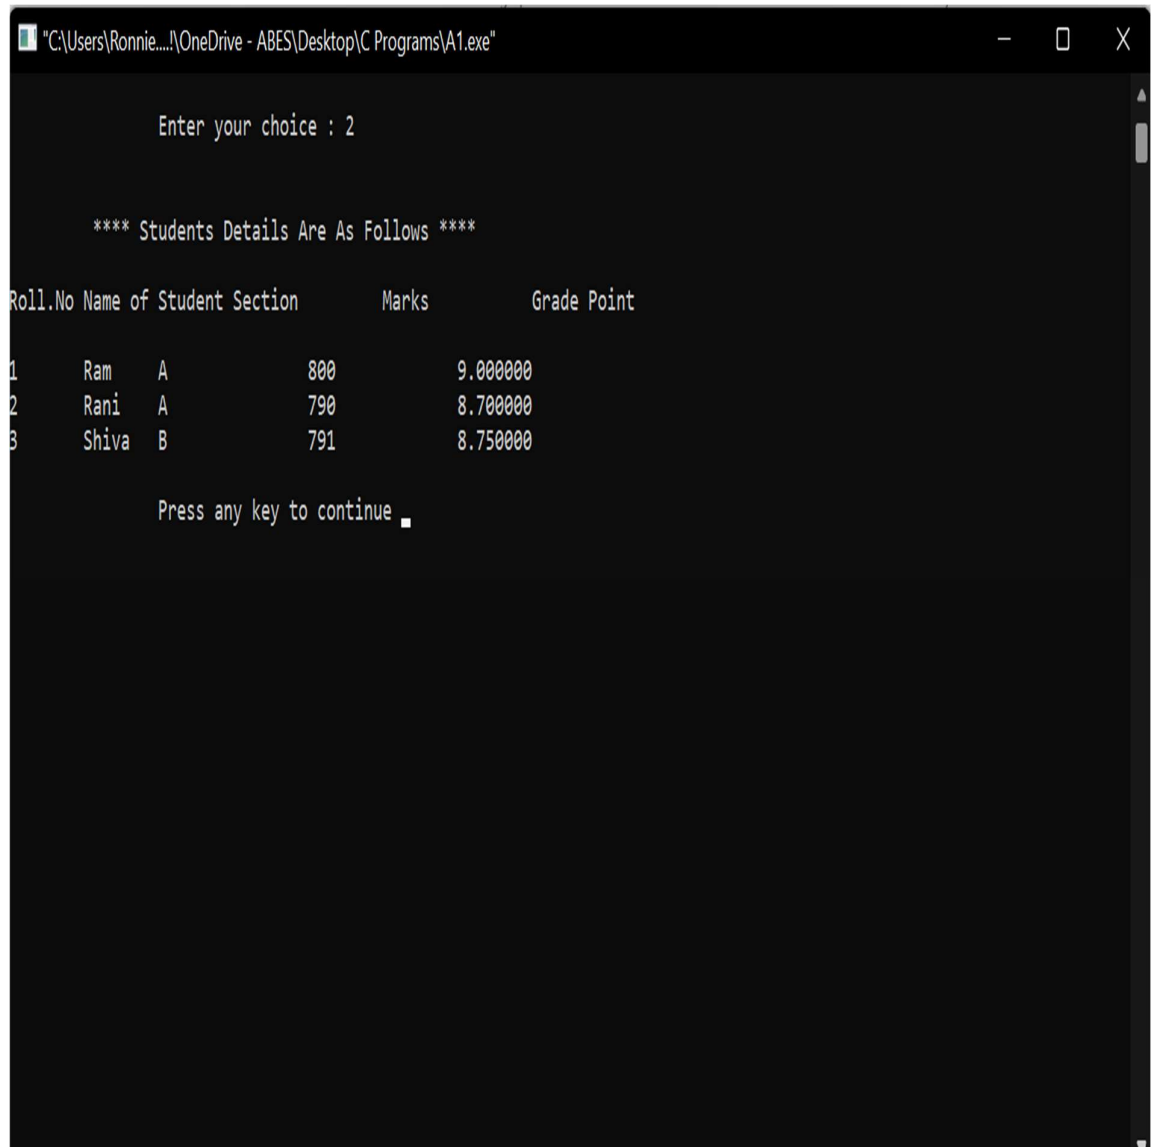

Enter Student Total marks: 791

Enter Student Grade Point: 8.75

!!! Student Record Inserted Sucessfully

Updated Record !!
```

- ❖ When user choose “**Display student record**” to see the recorded information then user get a screen which shows all the recorded data.

```
"C:\Users\Ronnie.....\OneDrive - ABES\Desktop\C Programs\A1.exe"

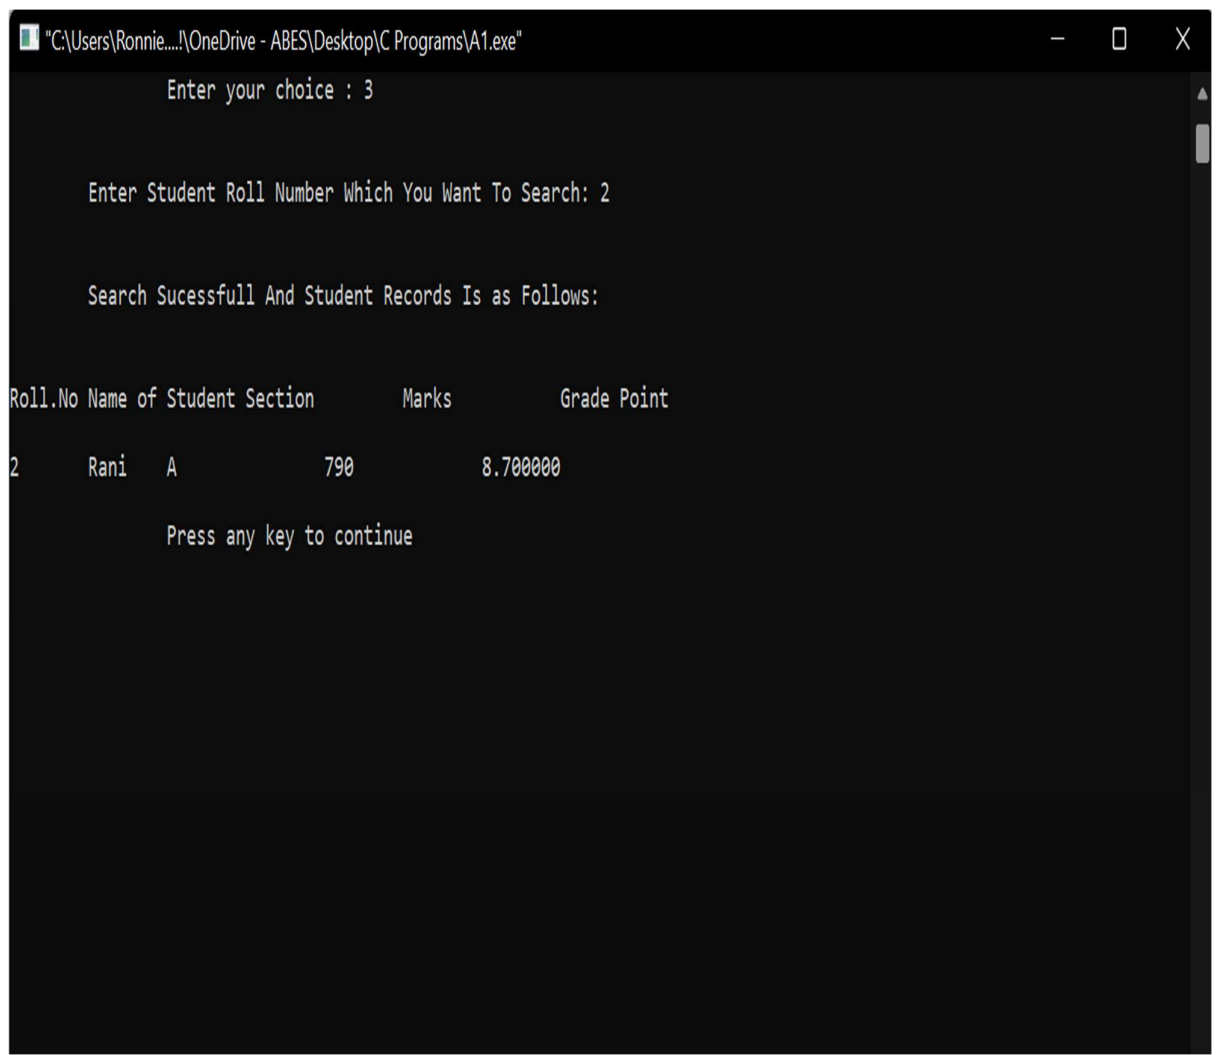

Enter your choice : 2

**** Students Details Are As Follows ****

Roll.No Name of Student Section      Marks      Grade Point
1      Ram      A      800      9.000000
2      Rani      A      790      8.700000
3      Shiva     B      791      8.750000

Press any key to continue .
```

- ❖ When user choose “**Search student record**” to search any student’s record then user need to insert a student’s roll no. to get that student’s record. Screen be like

The screenshot shows a Windows command prompt window with the title bar: "C:\Users\Ronnie....\OneDrive - ABES\Desktop\C Programs\A1.exe". The window contains the following text:

```
Enter your choice : 3

Enter Student Roll Number Which You Want To Search: 2

Search Sucessfull And Student Records Is as Follows:
```

Roll.No	Name of Student	Section	Marks	Grade Point
2	Rani	A	790	8.700000

Press any key to continue

- ❖ When user choose “**Update student record**” to change/correct the information of a particular student then user need to insert a student’s roll no. to update the student’s record. Then Screen be like

```
"C:\Users\Ronnie....\OneDrive - ABES\Desktop\C Programs\A1.exe"

Enter your choice : 5

Enter Roll Number of Student Whose Record You Want To Update: 3

*** Previously Stored Record Of Given Roll Number ***
Roll.No Name of Student Section      Marks      Grade Point
3      Shiva  B          791          8.750000

*** Now Enter the New Record ***

Updated Student Roll Number: 5

Updated Student Name: Shiva

Updated Student Section: A

Updated Student Marks: 750

Updated Student Grade Point: 8.49

Record Updated Successfully Check The Display Section!!

Press any key to continue
```

- ❖ When user choose “**Delete student record**” to delete the information of a particular student then user need to insert a student’s roll no. to delete the student’s record. Then Screen be like

```
"C:\Users\Ronnie....\OneDrive - ABES\Desktop\C Programs\A1.exe"
Enter your choice : 4

**** Previous Stored Data ****

**** Students Details Are As Follows ****
Roll.No Name of Student Section      Marks      Grade Point
1      Ram    A          800        9.000000
2      Rani   A          790        8.700000
5      Shiva  A          750        8.490000

Enter Student Roll Number Which You Want to Delete 5

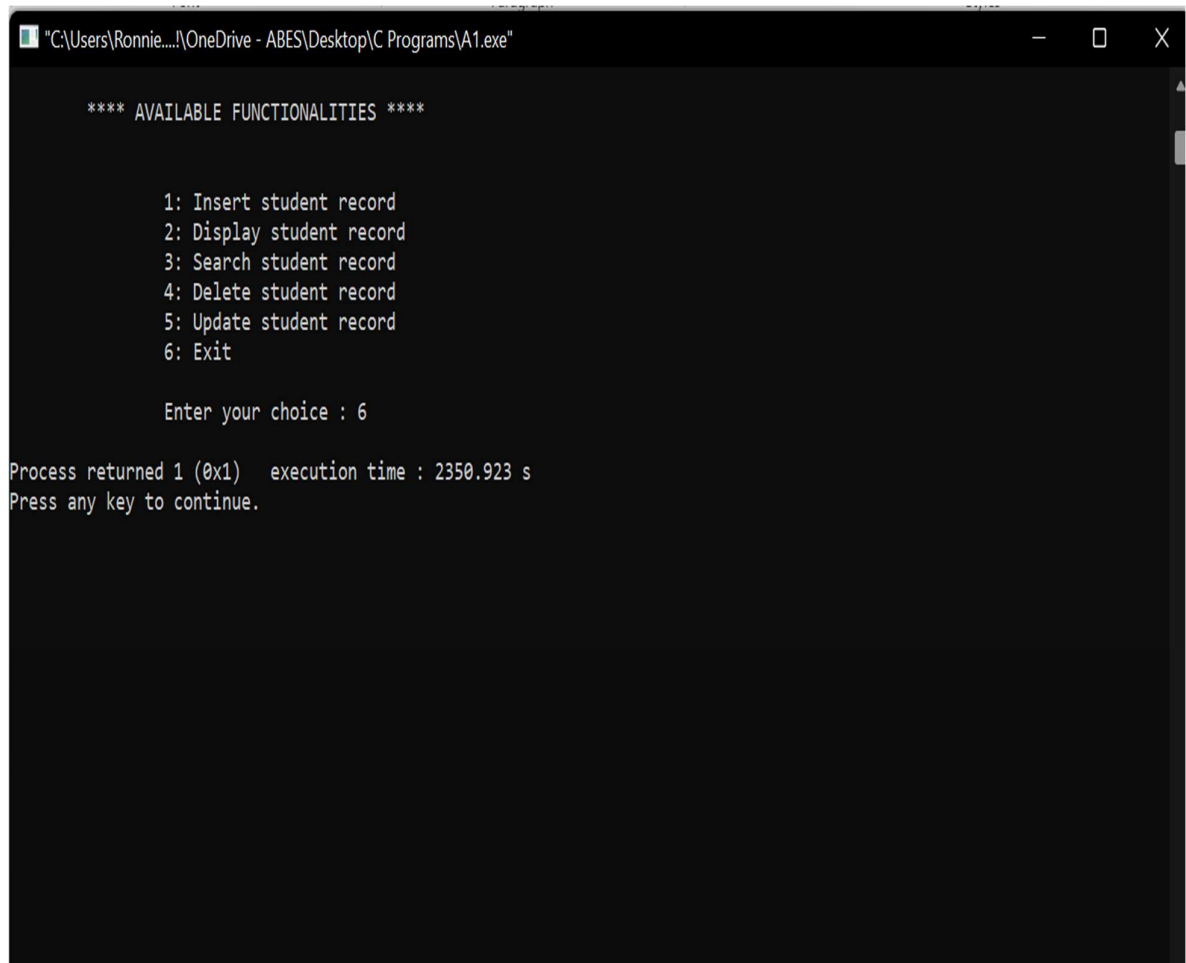

Record Deleted Sucessfully

Updated Record !!

**** Students Details Are As Follows ****
Roll.No Name of Student Section      Marks      Grade Point
1      Ram    A          800        9.000000
2      Rani   A          790        8.700000

Press any key to continue
```

- ❖ When user want to come out from the application then user have to choose the option “**Exit**”. Then runtime screen be like

```
"C:\Users\Ronnie....\OneDrive - ABES\Desktop\C Programs\A1.exe"

**** AVAILABLE FUNCTIONALITIES ****

1: Insert student record
2: Display student record
3: Search student record
4: Delete student record
5: Update student record
6: Exit

Enter your choice : 6

Process returned 1 (0x1)   execution time : 2350.923 s
Press any key to continue.
```

# Thanking You!
